# Prof. Alessandro Lanteri

Professor of Entrepreneurship, Abu Dhabi, University & Huie International Business School, Advisor at the World Economic Forum, TEDx Speaker

## HR Trends in the Digital Era

Prof. Lanteri does consulting and training on leadership and innovation with large multinationals, governments, the United Nations, consulting companies and start-up programs in four continents. His research focuses on innovation and ethics and has been published by top international journals and publishers, including Harvard Business Review Arabia, LSE Business Review, World Economic Forum Agenda, Forbes.

## Masterclass overview

Most discussions of the future of work concern automation and the replacement of human workers with algorithm-powered robots. The recent difficulties of Tesla with hyper automation in manufacturing suggest that humans should not be concerned about being replaced by robots. Instead, they should learn how to work alongside them. This will transform the design of work and the nature of jobs. Humans will need new skills to succeed in the organizations of the future, but these skills will become obsolete faster than ever. At the same time, robot coworkers will put pressure on humans to perform at ever-higher levels. This masterclass explores how the HR function needs to evolve in response to the digital megatrends that are transforming the world of work.

## Masterclass structure

- Humans in the future of work and the HR function
- Collaborative Intelligence and the new 'Division of Labor'
- Human skills for the future of work
- Leadership and culture challenges for HR in an age of ultra-rapid change
